CADA-TB-EN

MEMORANDUM FOR: E&PA

SUBJECT: Use of Envirotac II on Ammo Supply Point Access Road, CSC Scania

1. During a recent rainstorm, the main access road to our ammo supply point was washed out impacting mission response time and creating an unsafe condition for heavy vehicles navigating the site. Using Envirotac II already pre-staged at our site for dust and erosion control, our engineers were able to use locally available aggregate to restore the washed out sections and create a stable embankment. The road was also re-formed using the product after a new sub-base was installed.
2. We were very fortunate that Envirotac II was on site to allow a rapid response to this mission impacting situation. Once mobilized, the entire work of repairing, stabilizing and re-surfacing the road (approximately 250 meters) took only four days using on-hand assets. The fast curing of the product allowed mission operations to commence on the fifth day. To date there has been no deterioration of the road surface even with daily heavy vehicle operations.
3. My engineers have recommended the use of Envirotac II for further road repairs and stabilization both for our camp and local development projects. The point of contact for this project is CPT R. Obieta at DSN 318-837-1053 (rafael.obieta2@us.army.mil).

Subj: Envirotac II Dust Palliative

Dear Jerry:

The City of Phoenix Aviation Department has approved the use of Envirotac II for dust palliative surface stabilization on the above-referenced project. A copy of the City's April 16, 2001 approval letter along with your two (2) recent submittals are enclosed.

Do not hesitate to contact me at (602) 244-2650 if you have any questions.

Sincerely,  
PARSONS BRINCKERHOFF CONSTRUCTION SERVICES, INC.

11 Mar

Mr. John Vermillion  
Environmental Products and Applications, Inc.  
10722 Arrow Route  
Suite 116  
Rancho Cucamonga, CA 91730

Dear Mr. Vermillion,

I want to thank you for your support to our recent operations at Forward Operating Base Rhino, Afghanistan. The harsh desert environment at Rhino was a challenging place to operate, and dust control was an important issue for our Marines in the field. As soon as we got in contact with your company, you bent over backwards to quickly deliver your Envirotac II product to us. Also, you not only gave us professional and fast service, but I have also learned you contributed over \$10,000 of free Envirotac II Product to the Marine Corps to support Operation ENDURING FREEDOM. Your product worked great and was a huge help to our forces.

Your company has a long tradition of supporting the U.S. military, and I want you to know we appreciate the superb support you recently gave to U.S. Naval Forces Central Command and our Marine Forces ashore. Please accept this plaque as a small token of our appreciation

Sincerely,

J. Gostel  
Captain, SC, USN

Subj: LETTER OF APPRECIATION

Encl: (1) Certificate of Appreciation

1. I would like to thank you and your company for the outstanding service provided in support of MAWTS-1 and the Weapons and Tactics Instructor (WTI) Course.
2. As you know, we conduct numerous Forward Arming and Refueling Point operations during the WTI Course. These sites are located in an austere desert environment which causes great "brown out" conditions upon landing, highly increasing the risk of an accident. Your product applied to alleviate this problem performed as advertised and greatly reduced the brown out conditions. Not only did this aid in helicopter landings, but created a safer working environment for the ground support personnel and undoubtedly reduced our maintenance effort. Your professionalism, attention to detail, and "can do" attitude in working with my staff is deserving of a hearty thank you. My staff spoke highly of your efforts, to include the extra product applied and willingness to work within a tight budget. Working during the hottest time of the year in the Yuma area, you ensured that the job was done right the first time and ahead of schedule.
3. Again, my deepest appreciation for your efforts and those of your workers. Please accept the Certificate in appreciation of the services performed

**RE: City of Phoenix Project No. AV080000022 FAA: North Runway  
Reconstruction Project, Contract No. 93103: Item P-160 Dust Palliativ  
Stabilization: Environmental Products and Applications Dust Palliativ  
Product, Envirotac II.**

Dear Mr. Emery:

The Aviation Department Environmental Section has reviewed the Envirotac II pr  
submittals and has concluded that the dust palliative product complies with the sec  
160 specifications. Envirotac II is approved for use only on the North Runway  
Reconstruction Project. Per the specifications, please ensure that any new or upda  
written or verbal information regarding Envirotac II is immediately made availabl  
Aviation Department.

Please contact the Aviation Department Environmental Section at (602) 273-8861  
questions or comments.

Sincerely,
